

Business Requirements Document

Sunidra Mattresses Sales & Web Analytics Dashboard

Project Overview

Sunidra Mattresses, a premium mattress brand under Eastern Mattresses Pvt. Ltd., operates through multiple sales channels including retail stores, e-commerce platforms, and direct website sales. As the business expanded its online presence, management required a unified reporting solution to monitor both sales performance and website engagement.

The objective of this project is to develop an interactive Power BI dashboard that combines sales analytics and web analytics, enabling stakeholders to evaluate business performance, customer behavior, and marketing effectiveness from a single platform.

Business Objectives

The dashboard should enable business users to:

- Monitor overall sales performance across products and channels.
 - Track revenue, profit, and profit margins.
 - Identify top-performing products and categories.
 - Analyze sales contribution by sales channel.
 - Understand customer purchasing behavior.
 - Measure website traffic and user engagement.
 - Evaluate marketing channel effectiveness.
 - Improve conversion opportunities through data-driven insights.
 - Support strategic sales and marketing decisions.
-

Stakeholders

Primary Users

- Sales Managers
- Marketing Managers
- Business Development Team
- E-commerce Team
- Senior Management

Secondary Users

- Operations Team
 - Product Management Team
 - Digital Marketing Team
-

Dashboard Requirements

Page 1: Sales Dashboard

Purpose

Provide a comprehensive overview of sales performance, profitability, and customer purchasing trends.

Key KPIs

- Total Revenue
- Total Profit
- Profit Margin
- Total Orders
- Average Order Value
- Product Performance
- Channel Contribution

Visual Requirements

Revenue Analysis

Display total revenue and revenue trends over time.

Product Performance Analysis

Identify best-selling mattress categories and products.

Sales Channel Analysis

Compare sales generated through:

- Retail Stores
- Amazon
- Flipkart
- Company Website

Geographic Analysis

Track revenue performance across states and cities.

Payment Method Analysis

Analyze customer payment preferences.

Profitability Analysis

Monitor profit and margin performance by product and channel.

Filters

- Date
 - Product Category
 - Product Size
 - Sales Channel
 - State
 - City
-

Page 2: Web Analytics Dashboard

Purpose

Provide insights into website performance, visitor behavior, and marketing effectiveness.

Key KPIs

- Total Sessions
- Users
- Bounce Rate
- Exit Rate
- Average Session Duration
- Page Views
- Conversion Indicators

Visual Requirements

Traffic Source Analysis

Track traffic from:

- Organic Search
- Direct Traffic
- Social Media
- Referral Sources
- Paid Campaigns

Device Analysis

Analyze website traffic by:

- Desktop

- Mobile
- Tablet

User Engagement Analysis

Monitor:

- Session Duration
- Bounce Rate
- Exit Rate
- Page Views

Geographic Traffic Analysis

Track website visits by state and region.

Landing Page Analysis

Identify top-performing landing pages and pages with high exit rates.

Filters

- Date
- Device Type
- Traffic Source
- State
- Landing Page

Business Questions Addressed

The dashboard should help answer the following questions:

Sales Analytics

- Which products generate the highest revenue?
- Which products deliver the highest profit margins?
- Which sales channels contribute the most revenue?
- What are the sales trends over time?
- Which regions perform best?

Web Analytics

- Which traffic sources generate the most website visitors?
 - Which channels drive the highest engagement?
 - What is the website bounce rate?
 - Which devices are most commonly used by visitors?
 - Which pages experience the highest exits?
 - How does user behavior vary across regions?
-

Data Sources

Sales Data

Contains:

- Order Date
- Product Information
- Product Category
- Sales Channel
- Quantity Sold
- Revenue
- Cost
- Profit
- Payment Method
- Customer Location

Web Analytics Data

Contains:

- Session Date
 - Traffic Source
 - Device Type
 - Sessions
 - Users
 - Bounce Rate
 - Exit Rate
 - Page Views
 - Session Duration
 - Landing Pages
-

Data Model Requirements

The solution should follow a scalable star-schema design.

Fact Tables

- Sales Fact Table
- Web Analytics Fact Table

Dimension Tables

- Date
- Product
- Geography
- Sales Channel
- Device Type

- Traffic Source

The model should support fast filtering, drill-down analysis, and accurate KPI calculations.

Success Criteria

The project will be considered successful if it enables stakeholders to:

- Monitor sales and marketing performance in real time.
 - Identify top-performing products and channels.
 - Improve website engagement.
 - Optimize marketing investments.
 - Reduce manual reporting effort.
 - Support faster and more accurate business decisions.
-

Tools & Technologies

- Power BI
 - Power Query
 - DAX
 - Excel
 - Data Modeling
 - Data Visualization
-

Expected Business Impact

The dashboard provides a unified view of sales and digital marketing performance, allowing stakeholders to identify growth opportunities, optimize customer acquisition strategies, improve product performance, and make data-driven decisions. By consolidating multiple data sources into a single reporting platform, the organization can improve operational efficiency and gain deeper visibility into business performance.
